

MARKETING & ENGINEERING
INNOVATION

AGT Engineering

Assists its International customers in the introduction of their Hi-Tech products and systems into Europe, offering Marketing, Sales and Project Management combined with Engineering and Technology capabilities, to follow up the complete deployment of their projects on their markets.

Operational areas: Space, Aviation, Transportation, Energy.

Markets: Europe, USA, Canada, China.

AGT Laboratories

Operates in the innovative systems prototyping using the **latest 3D Printing and Additive Manufacturing technologies** in the industrial, medical, transportation and energy markets

PSI Europe

Operates the **reverse engineering, repair and remanufacturing of electronic and electromechanical systems** for the wind, solar, energy and rail propulsion systems

WHO WE ARE

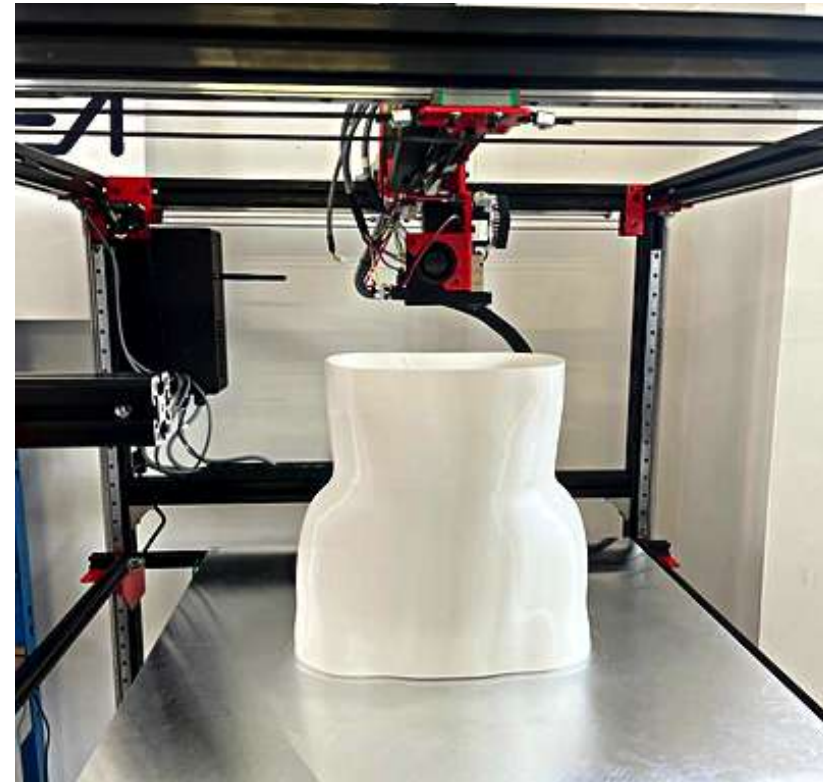

WHO WE ARE

AGT Labs

Our Laboratories develop, engineer and prototype for our customers new products and systems, improving their performance using **the most recent 3D printing technologies**, combining them with complex and non linear geometrical structures, to obtain single or lower parts products, lower weight and special performances.

Our production equipment is made or customized internally, developing **innovative electronic and mechanical control systems.**

COMMERCIAL MISSION

**Offer
international
Marketing, Sales
and
Project Management**

TECHNICAL MISSION

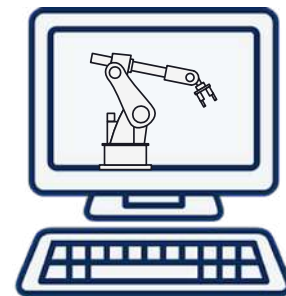

**Identify,
engineer and apply
innovation
to the products we
market**

BUSINESS UNITS

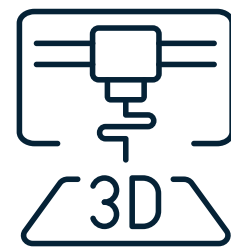

**Commercial
Services**

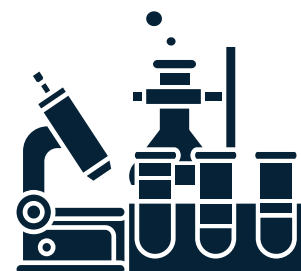

**Engineering
& Prototyping**

3D Printing

**Industrial
Research**

AREAS

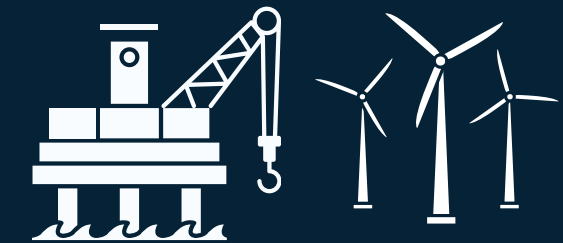

Rail

Aerospace

**Energy
Oil & Gas**

Medical

COMMERCIAL SERVICES

We offer
Marketing and Sales services

for Hi Tech European, North American
and Chinese Groups

in the European market.

We execute **Project Management** for a
full business assistance.

MARKETING PARTNERS

Tie Mao Glass (Hai'an, China)

Passenger windows and windscreens for rail, aviation and marine applications

Tecnologie Avanzate (Veroli, Italy)

Composite components for aerospace and transportation.
Floor systems for rail applications.

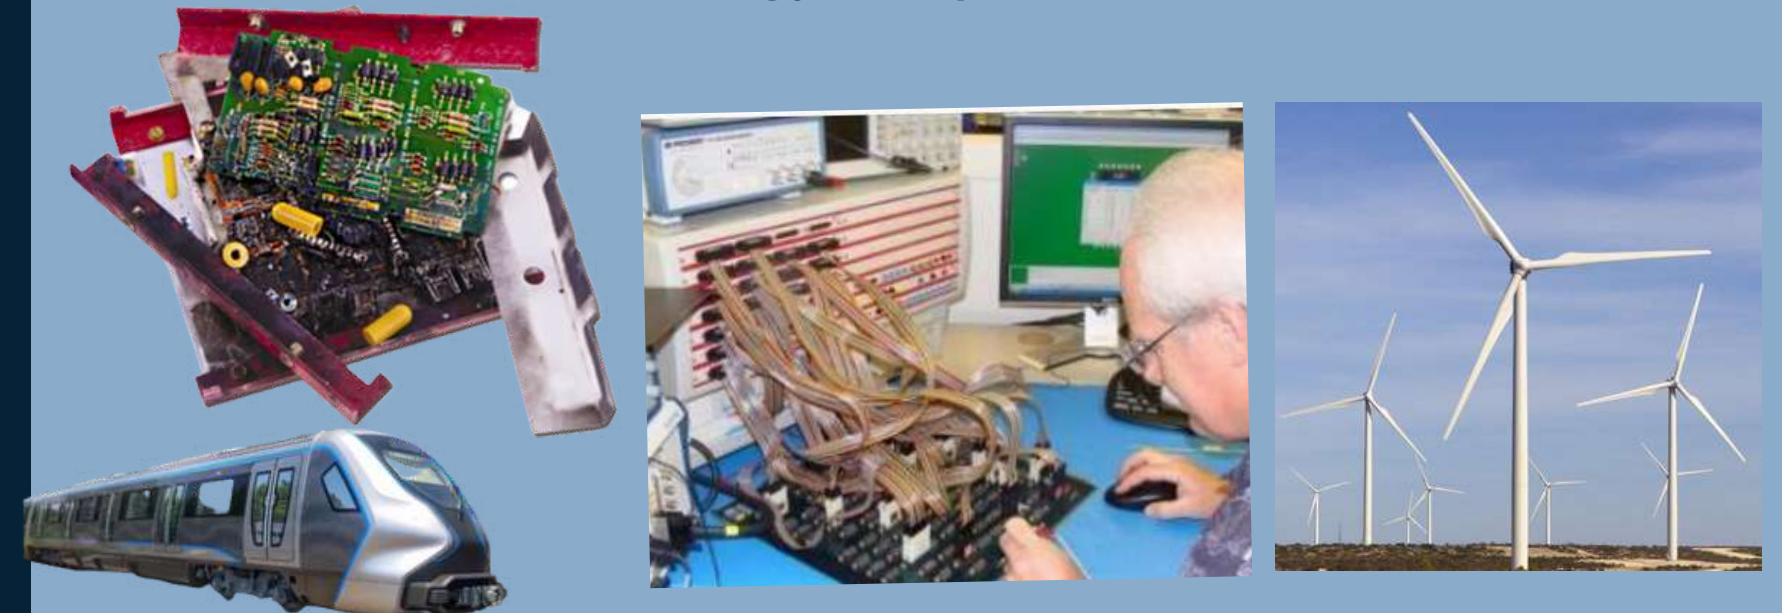

Andel (Dodworth, UK)

Environmental systems for power distribution stations

PSI Repair Services, INC. (Livonia, USA)

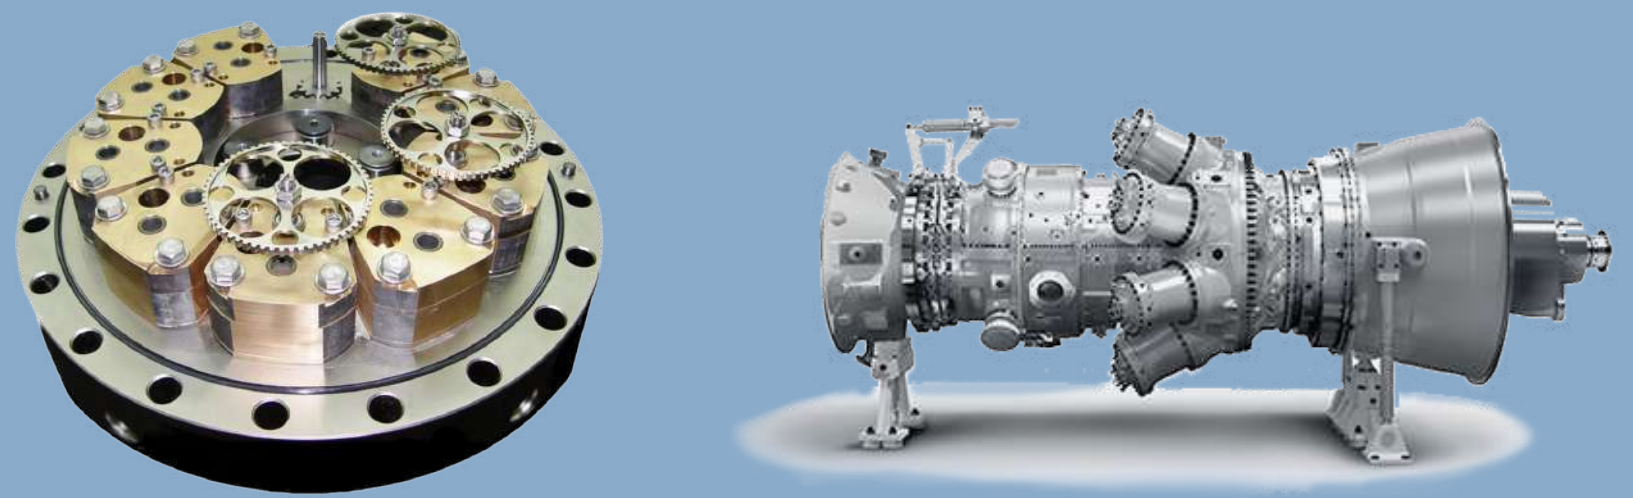

Repair, recondition and remanufacture of wind, solar and rail energy components

MARKETING PARTNERS

Roper Pumps (Athens, USA)

Pumps and flow dividers for Gas Turbines and Power Generation

Alphacasting (Montreal, Canada)

Castings for aerospace, transportation, medical and industrial

Dynamic Metals (Elkhart, USA)

Superalloy sheet metal components for aerospace

IST (Cambridge, Canada)

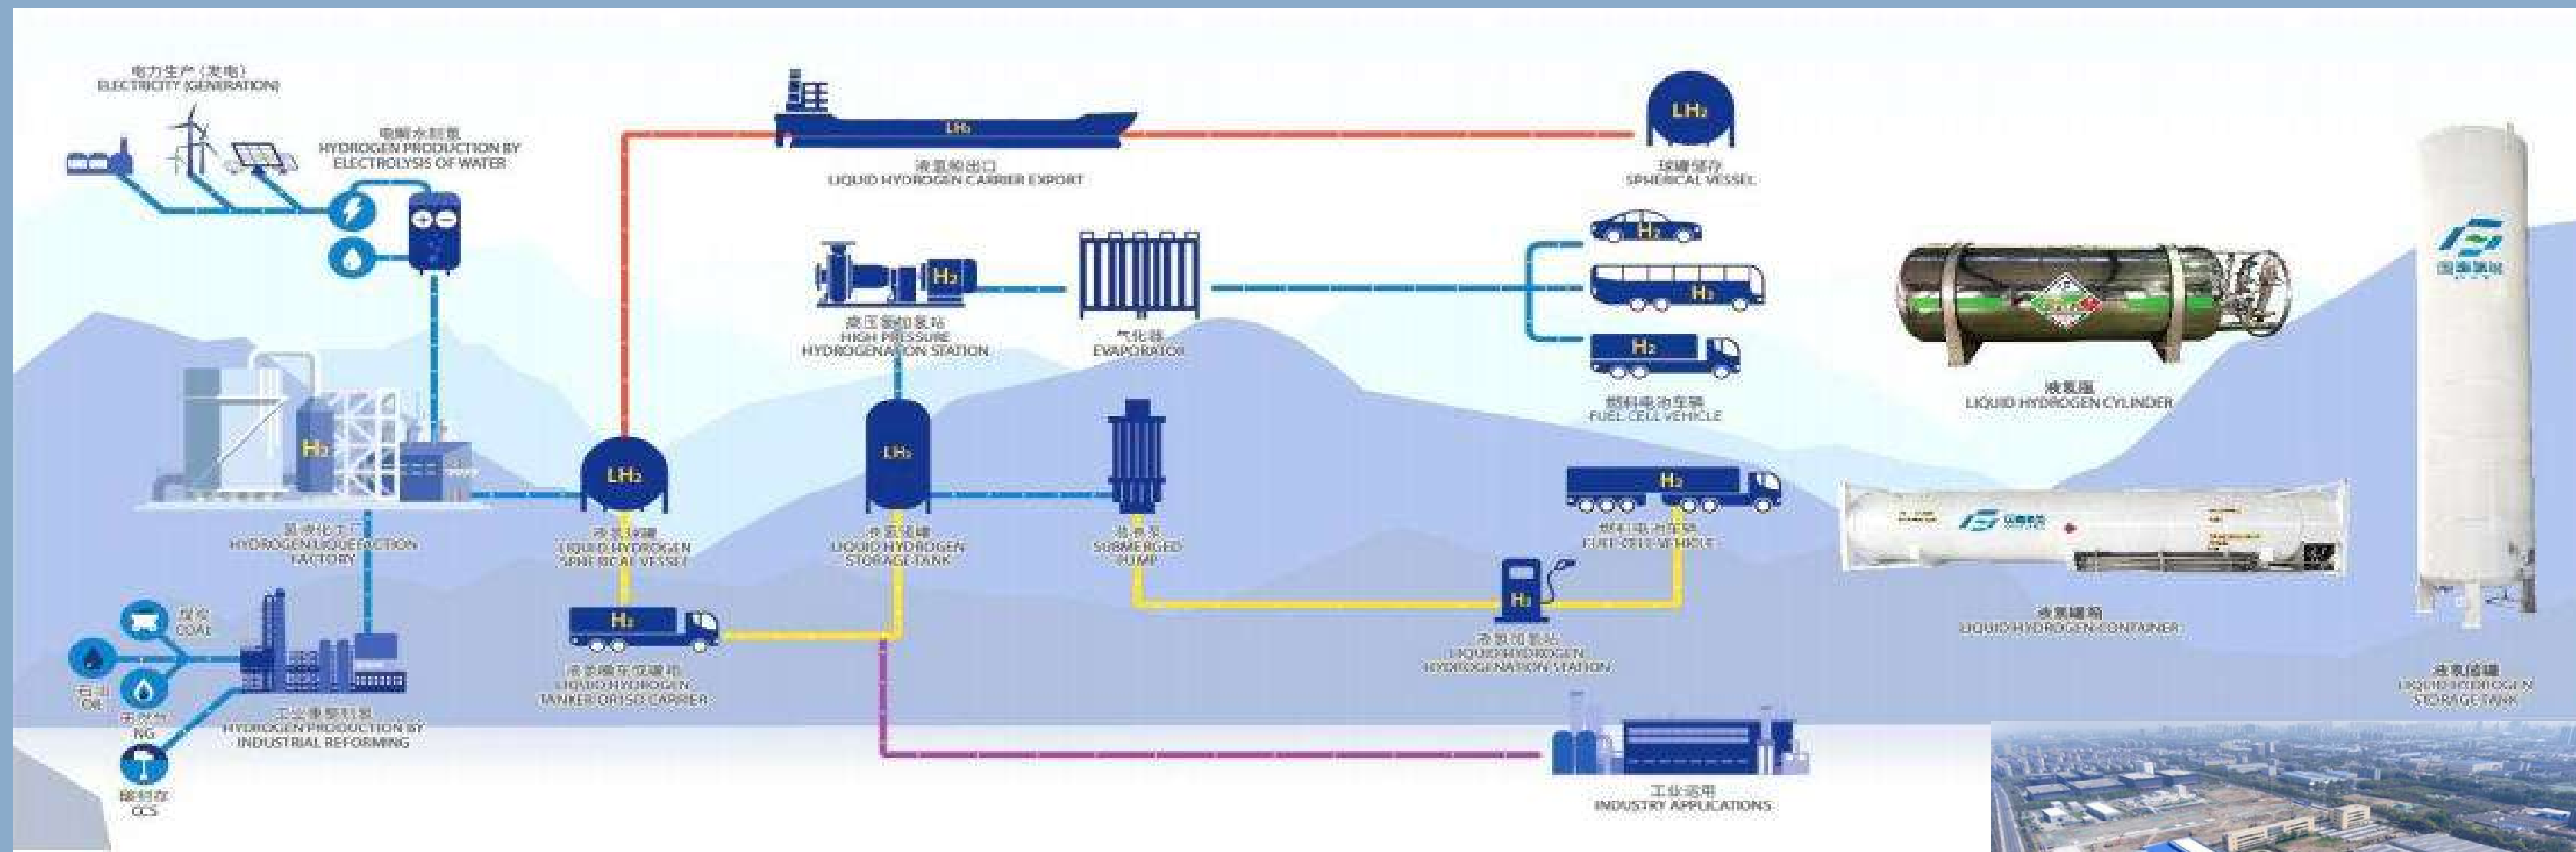

Once through steam generators

MARKETING PARTNERS

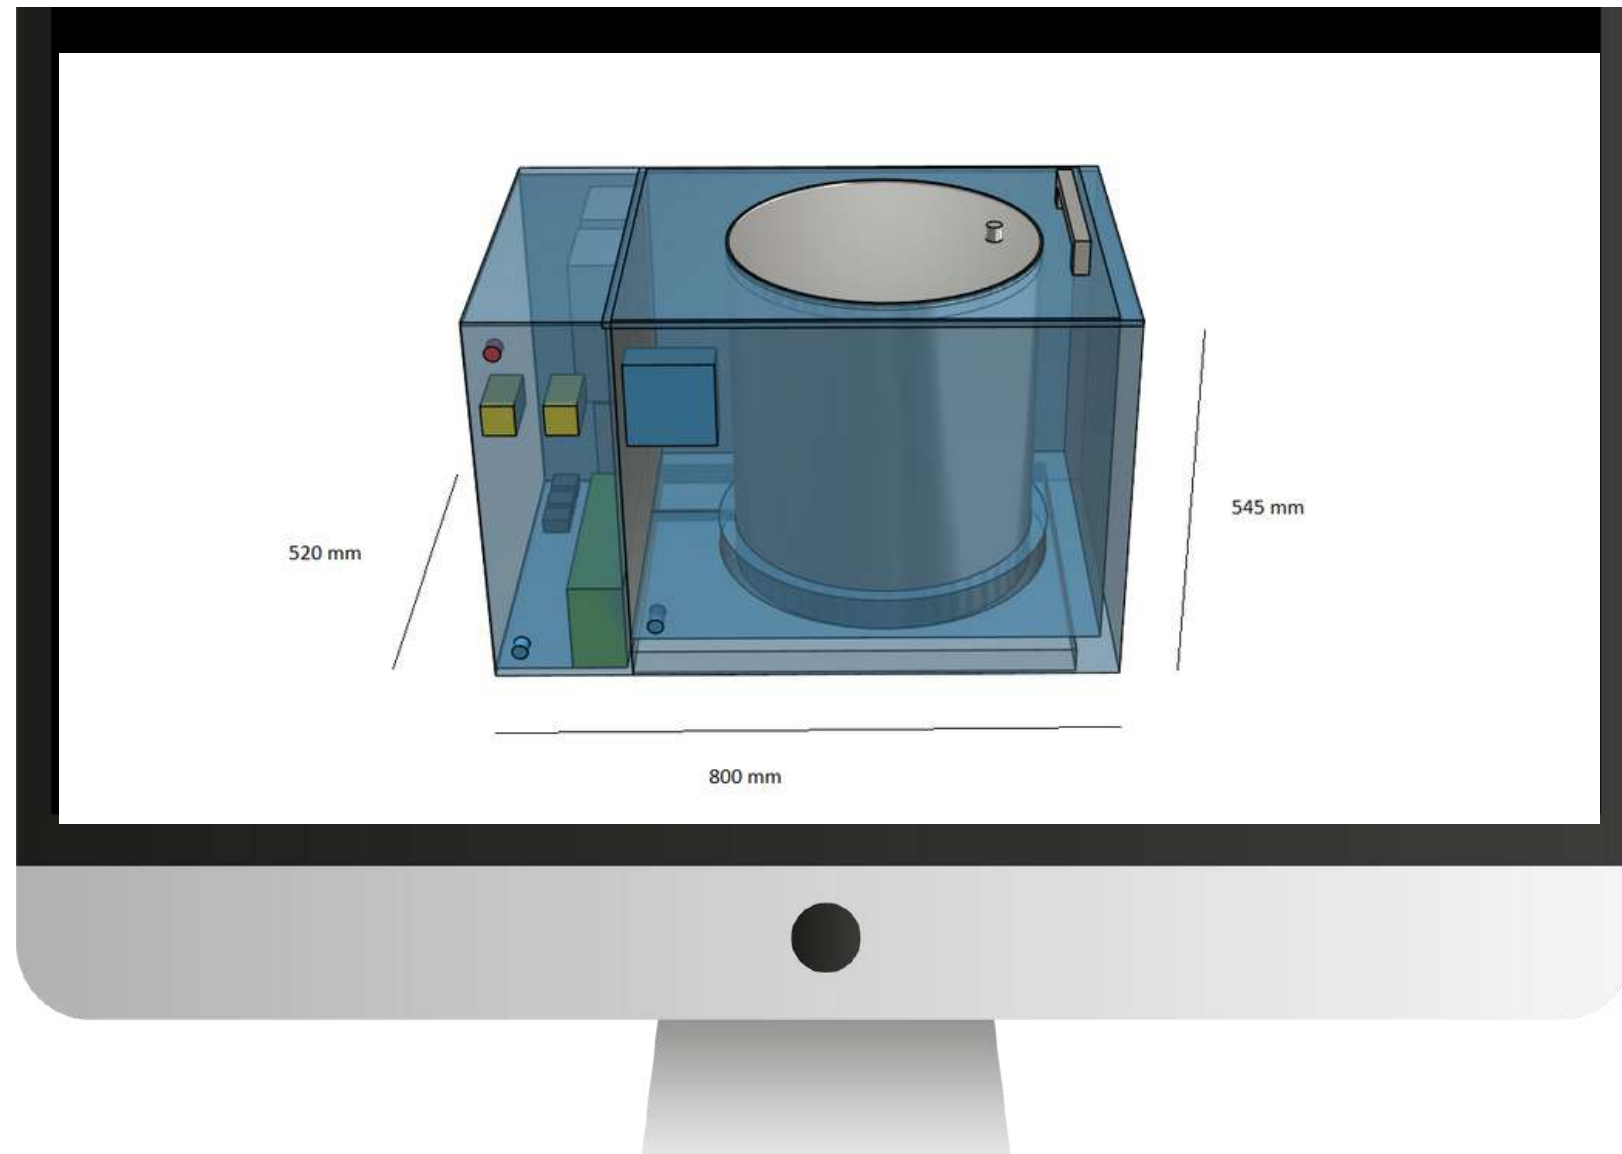

GuoFu Hydrogen Energy Equipment (Zhangjiangang, China)

Systems for H2 generation, distribution, refueling and storage

ENGINEERING AND PROTOTYPING

Our engineers conceive and develop **innovation** based on design to cost and sustainable materials and processes

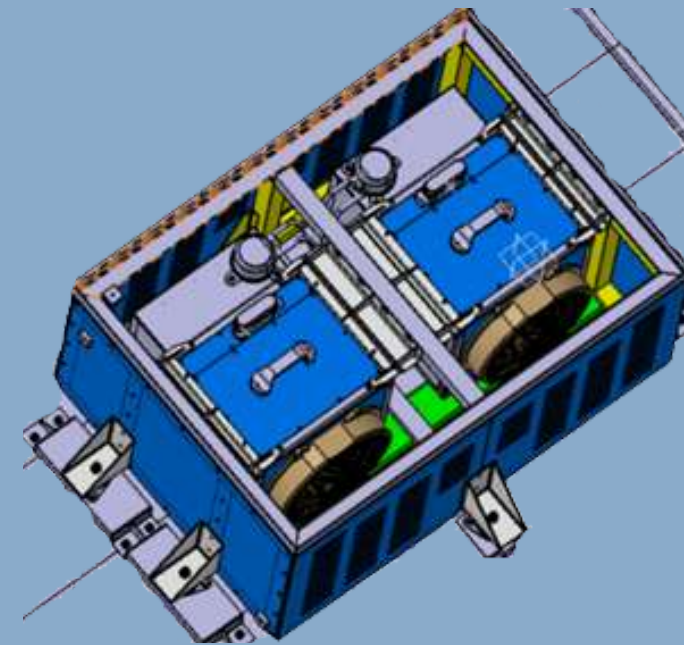

Innovation is generated from Marketing experience or to solve specific requirements

TYPICAL ENGINEERING PRODUCTS

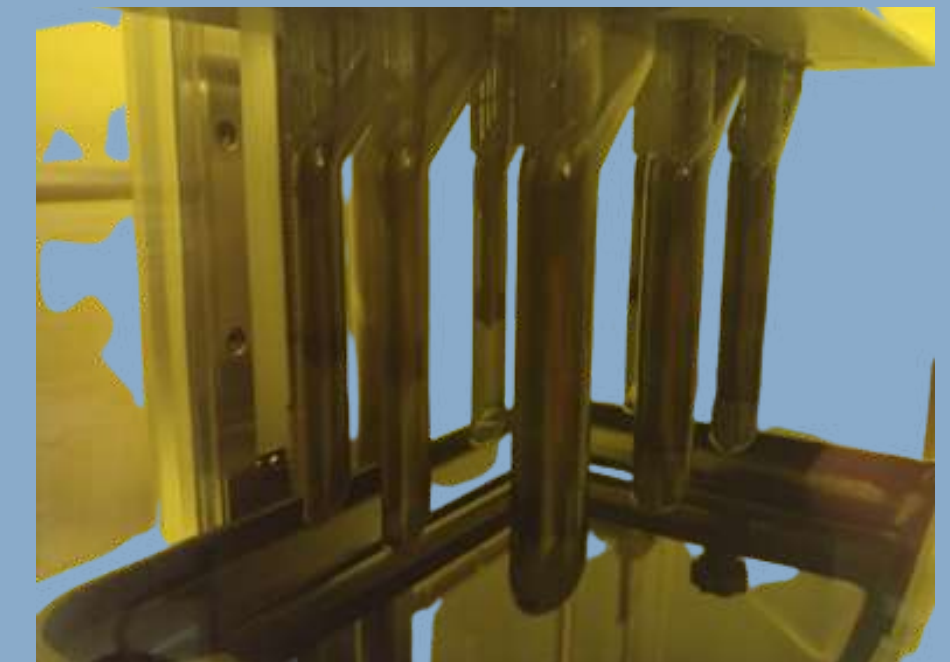

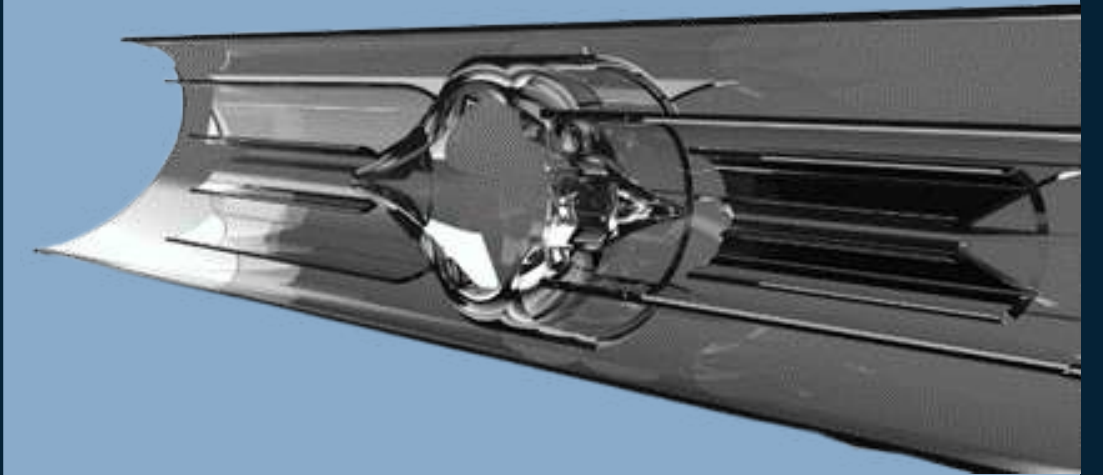

Propulsion System

Nanopowder harvesting

Blood flow cannula

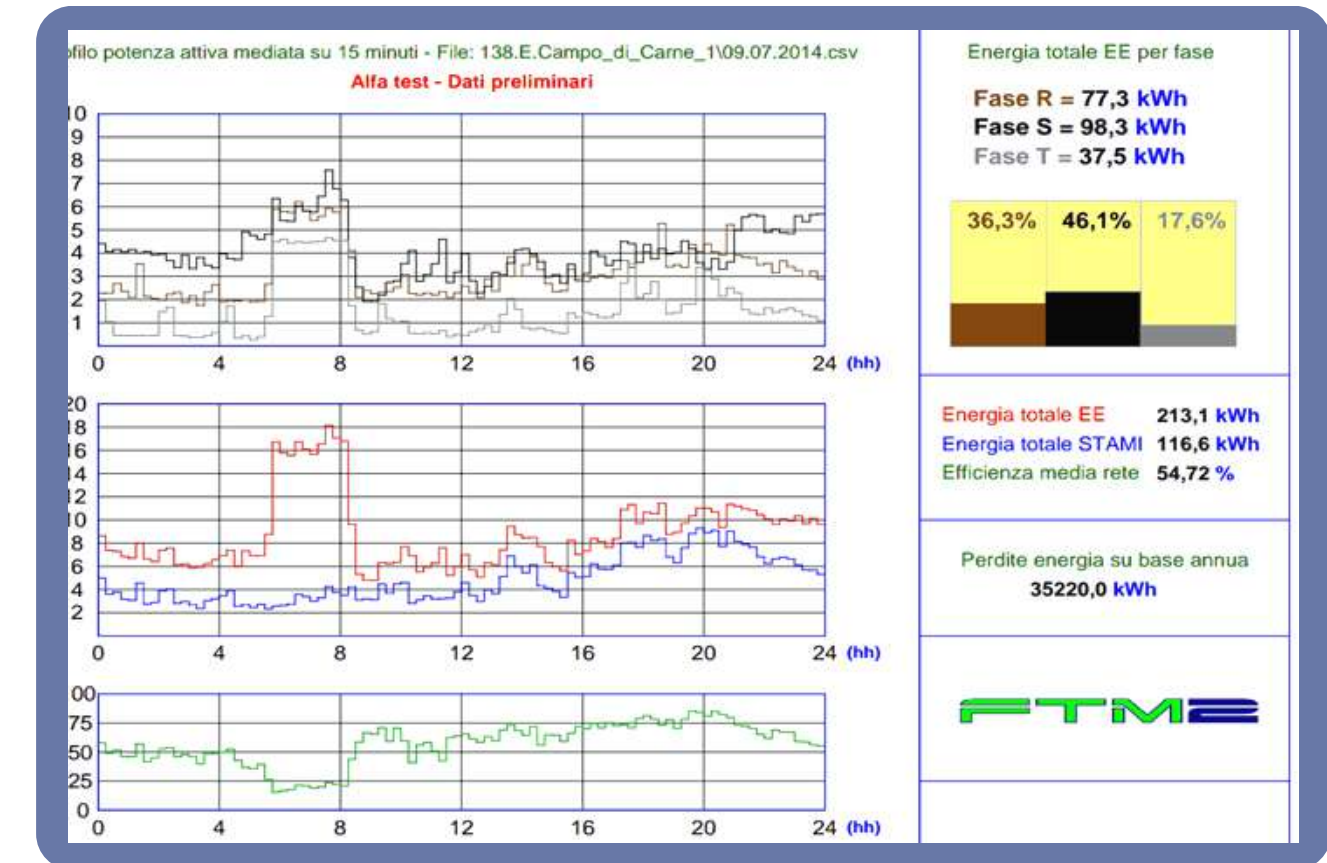

PRODUCTION

Proprietary products are developed for niche and special applications

Prototyping services are available to our Customers before serial production.

Thermal insulator

Energy frauds identification

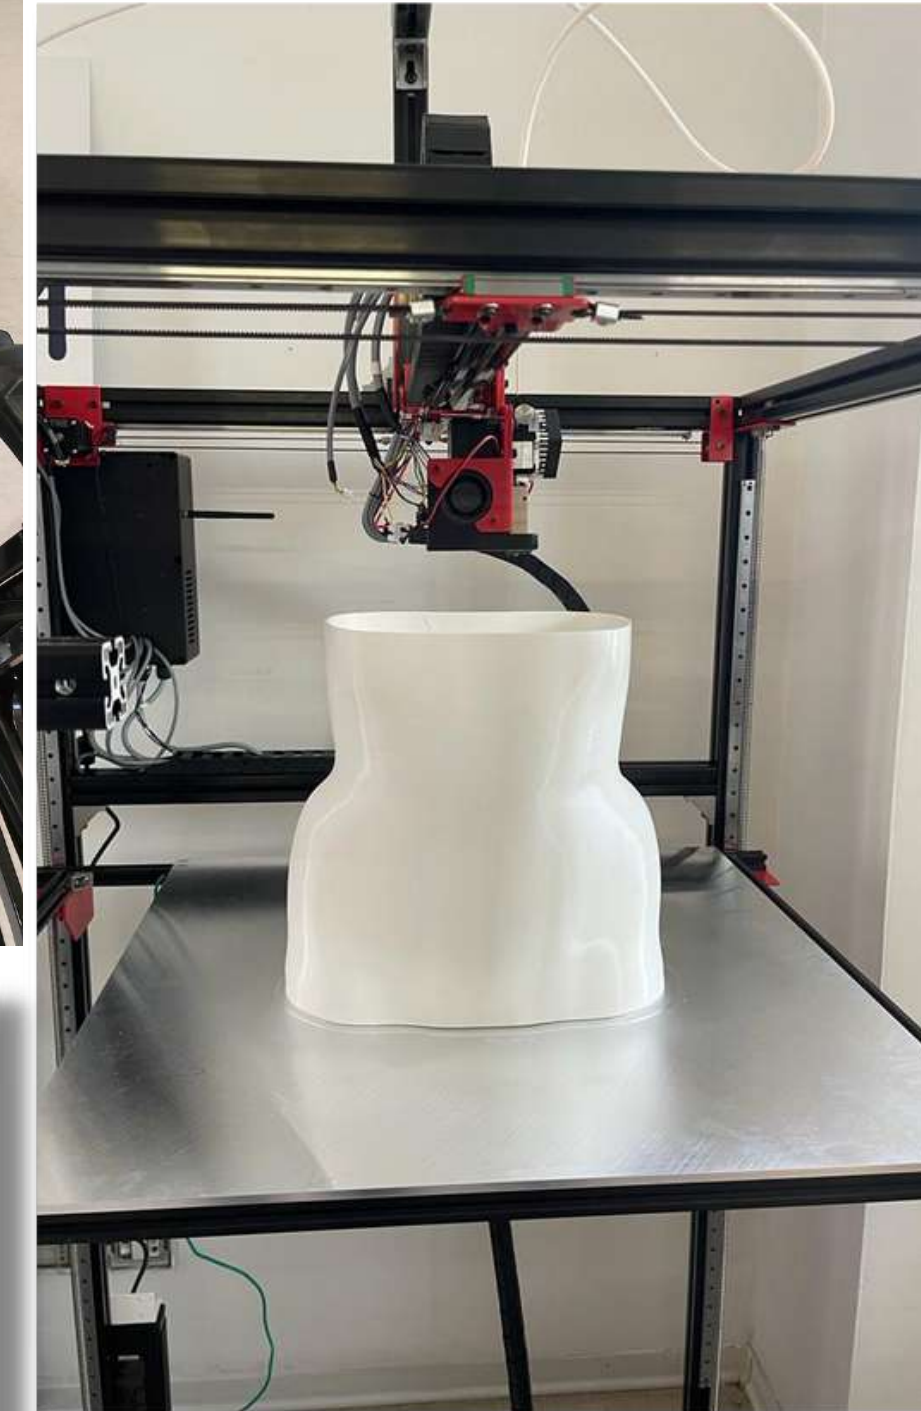

3D PRINTING

A fast growing
company branch develops

**3D Printing and Additive
Manufacturing services and
products**

for innovative applications.

INDUSTRIAL RESEARCH

Institutional and private Research projects support the Engineering.

International patents increase our company value.

Combustion Integrated Rack and Diapason on the International Space Station

EQUITY INVESTMENTS

Biotechnologies and innovation

We have **equity interests** in hi tech companies to explore special and emerging market niches

INTEGRATED ENERGY SYSTEMS
INTERNATIONAL

Advanced energy systems

Reverse engineering and repair services

CUSTOMERS AND PARTNERS

Thank you!
