Federica Rossi Gasparrini, President of Federcasalinghe

On behalf of the [Smart Cities Marketplace](#) and the Chair of [Deep Retrofitting](#) focus group we would kindly like to invite you to participate in the workshop “**Electrification of thermal loads and Renewable Energy Communities for urban renovation: safety, sustainability and quality of life for families**” on 20th March in Rome in the premises of [INAIL](#).

Simultaneous translation will be available.

The meeting [will be also streamed online](#) to enable the participation of group members, who are not able or are not planning to participate in the workshop physically.

Please note that the quality of web streaming is dependent on the internet connection on spot and not professionally supported.

Please indicate your interest to participate in the group meeting by responding to sergio.olivero@polito.it and state whether you are planning to participate physically or online.

We very much look forward to meeting you in Rome!

[Deep Retrofitting](#) focus group aims at enabling the electrification of heating and cooling in existing buildings. Specifically, the focus group mission will be to support the design and implementation of new sustainable approaches to building retrofitting, based on the **electrification of thermal loads** and the use of innovative business models based on **Renewable Energy Communities (REC)**: *making thermal load electric towards energy self-consumption*.

The Smart Cities Marketplace

The Smart Cities Marketplace is an initiative supported by the European Commission, bringing together cities, industry, SMEs, investors, financing & research institutions, and other smart city actors. It aims to function as a support hub for all that are interested in and challenged by financing Smart City solutions across multiple sectors, e.g. Energy, Transport/Mobility and digital solutions.

For more information on the Smart Cities Marketplace please have a look at our [digital brochure](#).

Best regards,

Sergio Olivero
Chair of the Deep Retrofitting Focus Group
Energy Center of the Politecnico di Torino, Italy
