

Energy Intelligence for Business

Your company at your fingertips

lit offers advanced energy monitoring system, ideal for commercial and industrial applications.

- **Energy consumption reports**
Generated on a hourly, daily, monthly, and yearly basis.
- **Monitoring with disaggregation of rooms and individual machines**
Using AI
- **Multi-phase compatibility**
Compatible with both single-phase and three-phase systems.
- **Fast and immediate configuration**
The *litbox* & *litplug* are easy to install, quick, and non-invasive.

Download usage data
with a **single click** from anywhere.
Reports comply with **CSRD** and **ESG** standards.

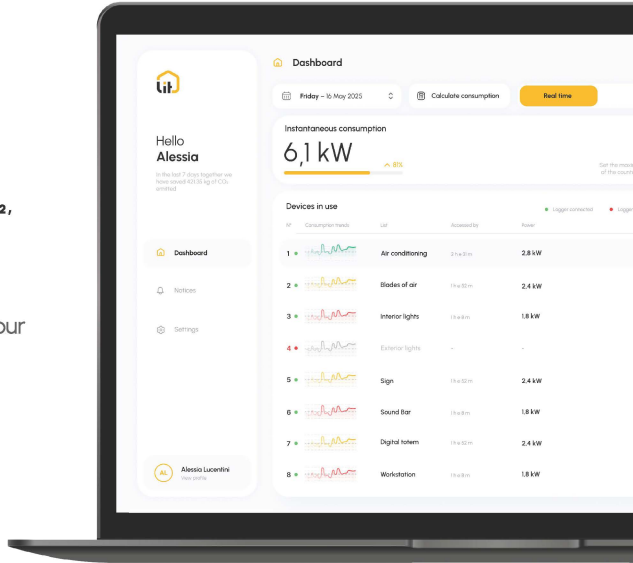

litplat

Measure the consumption of each device, providing data on **kWh**, **CO₂**, and **cost** through the litplat.

Monitor on/off status in real time, detect anomalies, and get a clear overview of your consumption and business emissions.

+ **Automation** and control
Via API and/or PLC

+ **Integration** with solar panels
and other renewable energy
sources

litplug

litbox & litplug are easy to install, quick, and non-invasive.
